SUMMARY

Computer Science undergraduate student (6th Semester) specializing in AI/ML and Full-Stack Web Development. Proficient in building responsive, scalable applications using **ReactJS**, **.NET Core**, and Python. Experienced in designing relational databases (SQL Server/PostgreSQL), writing optimized queries, and deploying REST APIs, backed by peer-reviewed research published with the IEEE.

EDUCATION

KGRH

B.Tech, Computer Science (CSE-AIML) — Current CGPA: 7.83

Hyderabad, India

Expected 2027

Sree Tapasya Junior College

Intermediate — MPC (Mathematics, Physics, Chemistry) — Score: 92.6%

Hyderabad, India

2021 - 2023

PUBLICATIONS & RESEARCH

IEEE CCIC 2026 Conference

International Conference

Research Author – Automated Personality Assessment Using XGBoost

February, 2026

- Architected and evaluated an XGBoost machine learning model integrated within a web data pipeline.
- Attained an 89.54% test accuracy rating by utilizing feature engineering and SMOTE data balancing.
- Presented original system architecture blueprints at an international IEEE conference.

EXPERIENCE

IBM SkillsBuild (CSRBOX)

Remote

Artificial Intelligence Intern

July, 2024 - August, 2024

- Collaborated within an agile framework to design, build, and optimize responsive chatbot interfaces.
- Completed hands-on training in core ML algorithms, data workflows, and system deployment lifecycles.

AI Club, KGR CET

Hyderabad, India

Volunteer – Buildverse.AI Hackathon

October, 2025 – November, 2025

- Coordinated participant onboarding, technical logistics, and core execution timelines for an AI hackathon.

PROJECTS

Cognify / Eduforge – Adaptive LMS

Tech Stack: ReactJS, .NET Core, SQL Server, Python, NLP

- Developed a full-stack personalized learning management platform featuring an interactive code playground.
- Designed secure RESTful web APIs to serialize data streams between the ReactJS frontend and .NET Core backend.
- Structured relational database schemas in SQL Server to maintain real-time user progress tracking.

Chiron Healthcare Assistant

Tech Stack: ReactJS, .NET Framework, SQL Server, OCR, NLP

- Engineered a responsive clinical web application tailored for parsing and structurally analyzing laboratory reports.
- Integrated OCR pipelines to extract unstructured text data strings directly into a secure SQL Server backend.
- Deployed a predictive classifier to diagnose Chronic Kidney Disease risks, outputting live metrics to the UI.

CERTIFICATIONS & COURSES

- **SAP Code Unnati Advanced Course (ID: CU26_33604):** Advanced training in Emerging Tech, covering Deep Learning, Edge Computing, SAP Analytics Cloud, and SAP ABAP development on Business Technology Platform (BTP).
- **IBM Professional Certification:** Artificial Intelligence Internship Accreditation via IBM SkillsBuild.
- **Generative AI:** Comprehensive introduction to core Generative AI Frameworks and application deployment.

TECHNICAL SKILLS & CORE COMPETENCIES

- **Languages & Web Tech:** Python, C# (.NET Framework / .NET Core), SQL, JavaScript, ReactJS, NodeJS, jQuery, HTML5, CSS3, REST APIs.
- **Databases & Utilities:** SQL Server, MongoDB, MySQL, PostgreSQL, Database Schema Design, Git, GitHub, Visual Studio, Jupyter Notebooks.
- **Frameworks & Libraries:** NumPy, Pandas, Scikit-learn, SpaCy, NLTK, OpenCV, Matplotlib, Django.
- **Core Domains:** OOPs Concepts, Software Development Life Cycle (SDLC), Data Science, Machine Learning, Deep Learning, NLP.
